Reading for pleasure

A 2013 research paper by two academics at the Centre for Longitudinal Studies on the beneficial effects of reading for pleasure in childhood has attracted a remarkable amount of interest from schools, libraries and literacy organisations around the world.

This case study shows how the findings have been used to help protect library services, to persuade children of all ages to spend more time reading, and to encourage parents to support schools’ home reading initiatives.

The research has also influenced the thinking of policy-makers, educationists and local authority administrators in not only the UK but a number of other English-speaking countries.
What the research discovered

The CLS study found that children who read for pleasure made more progress in maths, as well as vocabulary and spelling, between the ages of 10 and 16 than those who rarely read.

The research, which is believed to be the first to examine the effect of reading for pleasure on cognitive development over time, was conducted by Professor Alice Sullivan and Matt Brown. They analysed the reading behaviour of approximately 6,000 members of the 1970 British Cohort Study, which is managed by CLS and funded by the Economic and Social Research Council. Their research looked at how often cohort members read for pleasure during childhood and their test results at ages 5, 10 and 16.

Perhaps surprisingly, reading for pleasure was found to be more important for children’s cognitive development between ages 10 and 16 than their parents' level of education. The combined effect on children's progress of reading books often, going to the library regularly and reading newspapers at 16 was four times greater than the advantage children gained from having a parent with a degree.

What the researchers have done to promote their findings

High-profile radio interviews: Professor Sullivan was interviewed by BBC Radio 4’s flagship morning radio programme, Today, on September 11, 2013. [http://www.bbc.co.uk/news/education-24045371](http://www.bbc.co.uk/news/education-24045371) She also gave interviews to BBC London TV, Sky News (radio), BBC regional stations and Al Jazeera, the Qatar-based broadcaster.

Guardian article: Professor Sullivan wrote a Guardian blog about her research, which has since been shared via social media more than 3,000 times. [http://www.theguardian.com/books/booksblog/2013/sep/16/reading-improves-childrens-brains](http://www.theguardian.com/books/booksblog/2013/sep/16/reading-improves-childrens-brains)

About BCS70

The 1970 British Cohort Study (BCS70) follows the lives of more than 17,000 people born in England, Scotland and Wales in a single week of 1970. Over the course of cohort members’ lives, BCS70 has collected information on health, physical, educational and social development, and economic circumstances, among other factors. Since the birth survey in 1970, there have been eight surveys at ages 5, 10, 16, 26, 30, 34, 38 and 42.
Press release: The researchers, working in collaboration with CLS communications staff, also issued a press release on their findings, which triggered a huge amount of media attention. See “Reading for pleasure puts children ahead in the classroom, study finds”, September 11, 2013 http://www.ioe.ac.uk/newsEvents/89938.html (the principal press reports are listed below, under ‘Media coverage’).

Different forms of impact

Social science research can have various types of impact beyond the world of academia. It can influence changes in policy or practice. Sometimes it can even affect the behaviour of the public. More often, however, such research has a conceptual impact, changing people’s knowledge, understanding and attitudes towards certain issues.

Sullivan and Brown’s findings have undoubtedly had the latter form of impact, as this case study will demonstrate. But they also appear to have influenced the thinking of politicians and policy-makers – in the UK and other English-speaking countries.

Policy uses of the CLS study

The research was highlighted in the British Labour party’s education policy review1, published in April 2014. In his foreword to the report, David Blunkett MP, the former Secretary of State for Education and Employment, said: “…stirring texts and imaginative programmes of learning, which light a candle and engender a love of learning for life, must also be central to our goals. Indeed, an Institute of Education study in autumn 2013 found that children who read for pleasure perform significantly better at school in maths as well as English.”

There is also evidence that Sullivan and Brown’s research has helped to shape policies on reading and libraries in England, Scotland, and internationally – at either a national, regional or individual library/school level. Here are some other examples of how the findings have been used:

Stop Press:

On the day this case study was published, the Department for Education released an important policy document which also referred to Sullivan and Brown’s research -- Reading: the next steps. Supporting higher standards in schools https://www.gov.uk/government/publications/reading-supporting-higher-standards-in-schools

This document, which carries a foreword by Nick Gibb, Minister of State for School Reform, sets out how the government will support schools to improve reading standards, “and promote reading for pleasure”.

It cites Sullivan and Brown’s 2013 study and states (see page 18): “Reading for pleasure has also been found to be linked to greater progress in spelling and mathematics skills. Recent longitudinal research found the impact of reading for pleasure on progress in vocabulary, arithmetic and spelling between the ages of 10 and 16 to be four times greater than the impact of having a parent with a degree.”

Australia: The research has been cited many times by schools and state government officials in South Australia in order to support the Premier’s Reading Challenge, a long-running literacy initiative. When the organisers of the Challenge announced that the scheme would focus on secondary schools in 2014 they referred to Sullivan and Brown’s finding that reading for pleasure between ages 10 and 16 boosted all-round attainment.

Canada: The National Reading Campaign draws attention to the study in its web-based ‘toolkit’ for parents who want to develop their children’s interest in reading. In Vancouver, the vice-chair of the city’s library board has used the CLS research to demonstrate why public libraries merit public investment.

England: Sullivan and Brown’s findings have fed into Arts Council England’s review of the economic contribution of libraries and the Department of Business, Innovation and Skills inquiry into adult literacy and numeracy. A number of local authorities in England have also given serious consideration to the research and its messages for library and school reading policies.

New Zealand: The National Library of New Zealand has flagged up Sullivan and Brown’s findings in its web-based guidance for teachers on how to create a reading culture in the nation’s schools.

Scotland: In November 2013, Lin Anderson, chair of the UK’s 9,000-member Society of Authors cited the CLS findings in the first paragraph of her open letter to Edinburgh City Council protesting about plans to cut school librarian posts. The council later withdrew their plans in view of such public protests. The research also featured in a major Scottish review of the impact of school libraries on learning led by Professor Dorothy Williams of Aberdeen Business School’s IMAGES Research Institute.
United States: In Hillsboro, Oregon, the city’s library managers have chosen ‘student success’ as one of their key goals for 2014-17, explaining that Sullivan and Brown’s work shows that reading for pleasure can boost children’s all-round performance. (Further information on all of these policy-related uses of the research is provided below).

Conceptual impact and influence on practice

Proving conceptual impact is seldom easy but one of the ways it can be shown is by measuring public reaction to a particular piece of research. “How much discussion have the findings generated?” “What form has this discussion taken?”

The scale of the reaction to Sullivan and Brown’s findings is perhaps best demonstrated by one statistic – the number of times the press release on their findings has been accessed by visitors to the UCL Institute of Education and CLS websites. By early February 2015 that total had risen to more than 75,000. No other press release issued by CLS or the IOE in recent years has attracted that amount of attention.

The initial publicity also led to CLS receiving many phone calls and emails from schools, libraries, academics, students, literacy charities and policy-makers seeking further information about the research. Most of these follow-up requests came from UK organisations. But as this document will demonstrate, countries throughout the English-speaking world have also expressed exceptional interest in the Sullivan and Brown study.

Many libraries and literacy charities have used the research findings to advocate the benefits of reading for pleasure (See ‘Libraries and library associations’ list, below). Headteachers in the UK, Australia, US and Canada have also highlighted the findings in newsletters or presentations for parents in order to encourage home reading (see ‘Schools’ list).

Many schools have informed their pupils about the findings, too -- often in a headteacher’s address to the school assembly. One school, Robert Smyth Academy in Market Harborough, Leicestershire, went even further in order to ensure that the study’s findings got across to its pupils. It asked its GCSE English candidates to read the BBC News report on the CLS research as part of a homework exercise.

Understandingly, publishers, including the world’s biggest publisher of children’s books, Scholastic, have also used the findings to promote the value of their wares.

---

2 Between September 11, 2013 and January 23, 2014, the press release had 49,757 unique page views on the CLS website and 25,653 unique page views on the IOE website, making a total of 75,410. The average time spent on the page was 4min 30sec, suggesting that most people read the whole release.
Policy reviews

Labour party
“Review of education structures, functions and the raising of standards for all: putting students and parents first”, Labour Policy Review (2014). Sullivan and Brown’s findings are highlighted by David Blunkett, the former Education Secretary, in his foreword to this report http://www.yourbritain.org.uk/uploads/editor/files/130514_Report_FINAL.pdf

Arts Council England

Reading Agency
The agency cited the CLS study in its evidence to the 2014 Department of Business, Innovation and Skills inquiry into adult literacy and numeracy. http://readingagency.org.uk/adults/The%20Reading%20Agency%20for%20BIS%20Inquiry%20on%20adult%20literacy%20and%20numeracy%20Feb%202014.pdf

Scotland
“Impact of school libraries on learning” (2013) Critical review of published evidence to inform the Scottish education community. This review, led by Professor Dorothy Williams, of Aberdeen Business School’s IMAGES Research Institute, makes several mentions of the CLS research. https://openair.rgu.ac.uk/bitstream/10059/1093/1/Williams%20Impact%20of%20school%20libraries%20on%20learning%20SLIC.pdf

Other major bodies and initiatives

UK

National Child and Maternal Health Intelligence Network (Public Health England)
This site provides a link to the Sullivan and Brown study. http://www.chimat.org.uk/resource/item.aspx?RID=194820

Teaching English (website run by the British Council and BBC World Service)
This website article quotes Professor Sullivan and concludes: “In our roles, wherever we are, we ought to raise awareness on this issue, as teachers, trainers, parents, members of a community … and not only because it seems children who read for pleasure are likely to do significantly better at school than their peers, but as Jane Austen would say “I declare after all there is no enjoyment like reading!” http://www.teachingenglish.org.uk/blogs/admin/underlining-importance-encouraging-children-read-%E2%80%93-even-digital-age
New Zealand

Ministry of Education
“National Newsletter – English” - This newsletter is aimed at middle leaders in secondary schools throughout New Zealand. It is produced on the Ministry’s behalf by the University of Auckland and Te Tapuae o Rehua consortium. It summarises the CLS research and links to the press release.
http://www.otago.ac.nz/education/otago079479.pdf

Pakistan

Federal Board of Intermediate and Secondary Education
News blog for students based on BBC coverage of the CLS findings http://www.fbise.org/2013/09/reading-children-maths.html

South Australia

The CLS research is referred to in this newsletter for schools from Carmel Jones, manager of South Australia’s Premier’s Reading Challenge, which involved 125,000 children in the state in 2014.

The Premier’s Reading Challenge website states that the challenge will focus on secondary schools in 2014 and then lists the CLS findings relating to 10 to 16-year-olds.
http://www.premiersreadingchallenge.sa.edu.au/prc/pages/staff/PRCNews/?reFlag=1

Local authorities

These are some of the local authorities in England that have made use of Sullivan and Brown’s research.

Bristol City Council

This council website article describes steps that carers can take to promote the education of children they look after. It advocates listening to children read and reading to them and cites the CLS findings. http://www.bristol.gov.uk/page/children-and-young-people/carers-roles-supporting-education
Derbyshire

Members of Culture Derbyshire were provided with a two-page briefing note on the research in September 2013. The briefing was based on the CLS press release. (Culture Derbyshire is a multi-agency partnership which exercises strategic leadership of the county’s archives, arts, libraries and museums.)

Devon

This document on the county’s Library Strategy for 2014/15 to 2016/17 acknowledges that supporting learning for individuals of all ages is a core function of libraries. It points out that the CLS research has shown a significant positive correlation between academic achievement and reading for pleasure. It then lists the ways in which Devon’s libraries encourage children to read. https://new.devon.gov.uk/libraryreview/.../Devon-Libraries-needs-assessment.pdf

East Sussex

“Good practice on project development and management”. This county council report reproduces the first three paragraphs of the press release and provides a link to the full release. The author of the council report suggests that the CLS findings provide the kind of evidence that can be used in applying for funding for literacy projects.

Hampshire

Liverpool

City of Readers is a campaign to transform Liverpool into the UK’s “foremost reading city”. It is supported by Liverpool Learning Partnership, Liverpool City Council and the Reader Organisation. The following article on the City of Readers website summarises the CLS findings and displays graphs derived from the Sullivan and Brown research.
http://cityofreaders.org/about/

The extent of the public interest – and engagement – in the research findings is, however, perhaps best illustrated by the lists of schools, libraries, literacy associations and commercial organisations that have reported or discussed the research on their websites or in public statements. See below:
Literacy organisations and charities

The following organisations have publicised the CLS study’s findings on their websites. Many have provided links to the CLS press release issued in September 2013. (This is by no means an exhaustive list.)

UK

Book Trust (organisation that promotes books and reading)
“Evidence summary on effects of reading for pleasure - The importance of reading with children frequently, ideally every day”
http://www.natiperleggere.it/fileadmin/user_upload/documenti/Evidenze_e_varie_pediatri/Booktrust_Reading_every_day_evidence_summary_FINAL_-_1_2014.pdf

“Beyond Booked Up – final report” (2014)
Beyond Booked Up is a Booktrust-funded programme that provides reading materials for Years 7 and 8 pupils in disadvantaged areas of England. This report highlights the finding “that reading for pleasure has been associated with progress in mathematics as well as vocabulary and spelling”. http://booktrustadmin.artlogic.net/usr/resources/1110/bbu-final-report.pdf

Carnegie UK Trust (charitable trust)

United States

Cecil County Public Library, Maryland
Annual Report 2013. Quotes the CLS research and explains that the library applies research findings as part of its programme to help school performance.

Great River Regional Library, Minnesota
News report on findings

Hillsboro, Oregon
This city’s Library Strategic Plan for 2014-2017 uses the CLS findings as part of the rationale for one of its key goals – student success. “Since reading for pleasure puts students ahead in the classroom, 95% of the time elementary school-aged students will find books for reading pleasure on each visit to the library,” it says before referring readers to the CLS research.

Kansas Association of School Librarians
News report by teacher who says she is using the CLS findings to support her school library. “I’m always looking for ways to show the library’s relevance and importance, and I think this study does a lot to reinforce that idea,” the writer says.

Library City (group that is trying to ensure America’s libraries survive in the digital era)
This organisation says it has often cited the Sullivan and Brown research. See, for example, http://librarycity.org/?p=11603 or this article by one of Library City’s founders, David Rothman, in The Chronicle of Philanthropy http://philanthropy.com/article/The-Rich-Could-Tackle-Many/146911/. Rothman says that the case for a national digital library in the US is strengthened by Professor Sullivan’s argument that “new technologies, such as e-readers, can offer easy access to books and newspapers and it is important that government policies support and encourage children’s reading, particularly in their teenage years”.

School Library Journal
News article on Sullivan and Brown findings
New Zealand

National Library of New Zealand
The study is quoted in this web-based guidance for teachers on how to create a reading culture in schools.

International

International Federation of Library Associations and Institutions
Blog with links to CLS press release and research paper

Schools

UK

Blessed William Howard Catholic High School, Stafford
Website news item reporting that the school is campaigning to buck the trend of secondary school age children reading less and less for pleasure. It justifies its strategy by pointing to the CLS findings.
http://www.blessedwilliamhoward.org.uk/News/School-seeks-to-boost-students-reading-for-pleasur/

Churchill Academy and Sixth Form, Churchill, North Somerset
The school’s guide to the Accelerated Reader programme – produced for parents and carers - opens with a quote from Professor Sullivan on the quantifiable benefits of reading for pleasure.
http://www.churchill-academy.org/_files/Faculty/English/B58E68899E41504E68F3D8FABA22DE31.pdf

Epsom College
School magazine article by a college librarian which summarises the study’s key findings and adds: “For these reasons and more, the Epsom College Library staff see their role in encouraging reading for pleasure across the College community as a top priority.”

Glasgow Academy
This advice for parents of prep school children quotes the BBC report on Sullivan and Brown’s findings.
http://www.theglasgowacademy.org.uk/filemanager/userfiles/All_Files/Parents/Parents%20Information%20Booklet/information_for_parents_14-15.pdf

Harbinger Primary School, Tower Hamlets
School Development Plan 2013-14 - In their opening statement, the school’s head and
chair of governors explain that the school will focus its attention on reading, before adding that the CLS study found that children who read for pleasure are likely to do well in all subject areas.

Jewish Community Secondary School, Barnet
This report on the research – in a newsletter for parents - also emphasises that reading has been shown to benefit children’s all-round performance.

Lakeside Community Primary School, Derby
The school’s website summarises the research, provides a link to the release, and adds: “Interesting research so let’s get learners reading for fun! Comics, novels, poems, magazines, recipes anything for enjoyment!”

http://www.lakeside.derby.sch.uk/read-a-good-book/

Lutterworth High School
The school’s newsletter reproduced the full CLS press release

The Maelor School, Wrexham
This report refers to the research before urging parents to “Encourage your child to read for pleasure as much and as often as possible.”

Ormiston Horizon Academy, Stoke-on-Trent
The school’s statement about literacy development highlights the study’s key findings. It asks parents to encourage their child to read at home – and to listen to them reading.

http://www.ormistonhorizonacademy.co.uk/oha-literacy/

Penglais School, Aberystwyth, Ceredigion
This governors’ 2013-14 report to parents says that reading for pleasure must remain a priority and sets out Sullivan and Brown’s key findings.

Robert Smyth Academy, Market Loughborough, Leicestershire
All GCSE students at this academy are given homework booklets that include three tasks to be completed during one week. In autumn 2013 one of the tasks was to read the BBC News article on Sullivan and Brown’s findings and answer questions on it eg “Explain why
reading for pleasure is good for students' all-round learning.”

St Peter's secondary school, York
This headmaster’s assembly talk is devoted to the study’s findings and implications

St Swithun's Independent Day School, Winchester
Another message to parents which summarises the research findings and adds: “Sharing books with your children, reading aloud to them and showing them how much you enjoy books will benefit your children and give them and you great pleasure.”
http://www.stswithuns.com/The-traditional-sharing-of-a-bedtime-story-is-dying-out

Stokesley School, North Yorkshire (secondary)
This December 2013 newsletter informs parents that pupils have been told to bring books and magazines from home each day for a week. It explains why the school has taken this decision and directs them to a summary of the CLS findings.
https://vle.stokesley.n-yorks.sch.uk/user/59/209725.pdf

The Grange School and Sports College, South Gloucestershire
Sullivan and Brown’s findings were highlighted in a presentation for parents attending a Key Stage 4 (age 14 to 16) Information Evening

The Perse School, Cambridge
The CLS findings were cited in this school assembly, which promoted World Book Day.
https://thepereseschool.wordpress.com/2014/03/05/world-book-day-2014-why-you-should-read-novels/

Trinity Catholic High School, Woodford Green, Essex
This literacy leaflet aimed at parents of Year 7 pupils features a quote from Professor Sullivan.

Walthamstow School for Girls
The headteacher uses the school newsletter to highlight the CLS findings.
